Re: Amendment of the Commission's Rules with Regard to Commercial Operations in the 3550-3650 MHz Band, GN Docket No. 12-354

Dear Ms. Dortch:

On April 5, 2017, David Wright of Ruckus Wireless, a business unit of Brocade Communications System, Inc. met separately with Erin McGrath, legal advisor to Commissioner O'Rielly, Daudeline Meme, legal advisor to Commissioner Clyburn, and Paul Powell, Kamran Etemad, Robert Pavlak, and other staff of the Wireless Telecommunications Bureau and Office of Engineering and Technology, to discuss issues related to the referenced proceeding.

During these meetings, I provided an update on activity related to Ruckus Wireless' corporate structure and ownership and reviewed some of the testimony I had provided to the House Energy and Commerce Subcommittee for Communications and Technology on April 5, 2017 related to this proceeding. I also discussed the recent statements from Commissioners that a review and restructure of the rules for the 3.5 GHz CBRS band may be undertaken, and expressed our hope that the scope and timing for any such review would be communicated to the public as soon as possible, and that any changes to the rules resulting from such a review would not undermine the significant investments and efforts made by Ruckus and other companies to date, nor delay the availability of the band for commercial deployment.

This letter is being filed pursuant to Section 1.1206 of the Commission's Rules. Should you have any questions, please contact me.

Sincerely,

David A. Wright
